Some manufacturers license their brand names to other producers. Product name is a key part of the Icecat product title on a product datasheet. Multiple product codes can be mapped to one mother product datasheet if the specifications are identical. We map away wrong codes or sometimes logistic variants. An overhead projector typically consists of a large box containing a very bright lamp and a fan to cool it. On top of the box is a large fresnel lens that collimates the light. Above the box, typically on a long arm, is a mirror and lens that focusses and redirects the light forward instead of up. But the datasheet is not yet standardized by an Icecat editor.Need help becoming more productive. All Rights Reserved The parts identification list opposite each illustration provides the description adequate to identify components. Make sure part identification numbers for your component have not been amended by changes and updates made to your 2770 Overhead Projector. The Alpha Code indicates the design level, specific product characteristics, power cord or distribution specific to a country. See example below New and reconditioned parts are covered by the same 3M new parts limited warranty. Here are a few things to consider when deciding which projector is best suited for your application. Overhead projectors are widely used as a simple and reliable presentation solution. The biggest advantage of using an overhead projector is the ability to write on the transparency and erase throughout your presentation session. To make the best use of your projector choose the model that is right for your application. The image projected will get sharper as your lens quality increases singlet is the most basic triplet is the most advanced. There is a wide range of lumens available. Lower lumen models work best with black and white images. When using color, choose an overhead projector with high lumens so the color is vivid and bright. Open Lenses and mirror are not enclosed. Inverted This is an openhead version. An inverted head lowers the projector height so it is easier to view the screen. Color tuning For image color adjustment in a wide range of projection. Longer lamp life. Folding Post for storage and portability. Austin, TX 787269000 78812147532 Rev. The 3M logo, 3M, and ScotchBrite are trademarks of 3M Company. All Rights Reserved.

0 out of 5 stars Dont know how it compares to others, but it works, is lightweight, and great quality craftsmanship. I do have one problem. I just checked the online manual and cant figure out how many amps the cord is. I feel so dumb, but just dont know electrical things. I wanted to get a short extension cord from Amazon so I can use the projector in my classroom. The classroom is in an old part of a church that lets us use it for teaching ESL. There is only one outlet in the whole room. Anyway, can someone tell me the amps on the unit. I noticed the manual said to be sure and get the right amps for an extension cord or else the unit could overheat. Great! So now what, since they dont say what that is how many amps. Guess we are all supposed to know that stuff. Please try again later. Please try again later. IMPORTANT SAFEGUARDS When using your overhead projection equipment, basic safety precautions should always be followed, including the following 1. Read and understand all instructions before using. Operating The Projector 5. Read the Important Safeguards

before operating this projector. 6. Place LCD projection panel or film transparency in the center of stage glass 4. Set lamp brightness to " High" or " Low" position. Rotate focus knob 5 for sharpest image. Set Up Projector 1. Raise the post 1 until it locks into place. 2. 3. Page 4 Main Menu Lamp Changer 1708, 1720, 1750 Optical Adjustment 1708, 1720, 1750 If the selected lamp position 1 or 2 is burned out or missing, slide lamp changer lever 1 to select alternate lamp. Page 5 Main Menu Troubleshooting Problem Lamp does not illuminate but fan motor runs. Neither lamp nor fan energize. Fan motor does not run but lamp illuminates. After replacing a burned out lamp, the new lamp fails. Short lamp life Lamps seem to fail before expected life span. Projected image is wider at the top than bottom Vertical Keystoning. Projected image higher on one side Horizontal Keystoning. Projected image is dim.

Projected image does not have uniform brightness. Francais Contactez votre distribution ou le bureau de vente 3M ou vous avez achete votre appareil.
