This integrated capability provides existing CCD users with the flexibility to easily integrate the V5 CATIA product portfolio into their environment, while maintaining their current practices and procedures based on their CCD product use. This allows existing CATIACADAM drafting users to easily integrate the V5 CATIA product portfolio into their environment, while maintaining current practices and procedures based on the use of CATIACADAM Drafting. CATIACADAM Interface 1 offers several functions for CATIA users Integrated support for CATIACADAM drafting documents. CATIACADAM drafting documents can be opened using the V5R2 standard File Open facility. During this process, CATIACADAM drafting documents are automatically converted to the native V5R2 drafting format. CATIACADAM Drafting to V5 Conversion. The CATIACADAM Drafting to V5 conversion handles all 2D geometry and annotation elements supported within a CATIACADAM Drafting model. Some elements or element properties are not yet supported on both systems; therefore, some information will be transferred to the closest compatible element or property. In some cases, complex elements may be exploded into primitive elements during the transfer. Specific elements and element properties that are transferred include standard geometric elements, such as points, lines, circles, ellipses, and splines; geometric properties, including color, line style, and line thickness; annotation elements such as standard text, balloons, deltas, section lines, and text lines; text properties including text height, spacing, and color; and dimensions, including all CATIACADAM Drafting supported standards. Prerequisites. CATIA Version 5 products can be ordered as part of a configuration or as an addon product to a configuration. CATIA Version 4 Release

Dassault Systemes, a world leader in 3D and Product Lifecycle Management PLM solutions, has released new version of CADAM Drafting V5, has remained the productivity leader in industrial 2D design and drafting for over 30 years. Tens of thousands of CADAM users and millions of CADAM drawings currently support the development of products ranging from automobiles and airplanes to biomedical devices and consumer goods. CADAM Drafting for V5 brings the proven productivity of CADAM Drafting to the CATIA V5 product portfolio. It is designed to work in concert with CATIA V5 3D and CATIA V5 Interactive Drafting to provide todays drafters with a protected path to the powerful capabilities of CATIA V5. About Dassault Systemes. As a world leader in 3D and Product Lifecycle Management PLM solutions, Dassault Systemes brings value to more than 130,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systemes applications provide a 3D vision of the entire lifecycle of products from conception to maintenance to recycling. The Dassault Systemes portfolio consists of CATIA for designing the virtual product SolidWorks for 3D mechanical design DELMIA for virtual production SIMULIA for virtual testing ENOVIA for global collaborative lifecycle management, EXALEAD for searchbased applications and 3DVIA for online 3D lifelike experiences. NT 4.0, Windows 2000 or UNIX AIX, HP-UX, IRIX or Solaris can be a license server You must install LUM on the server and at least on one client. After installing LUM on one client, move the Winnt\i4ls.ini file to all other clients. Install the new ccdnls.dll with static binding support on all CCD clients. This dll is available from DSA's FTP Site. LUM is free for all platforms and can be downloaded from 2 A valid CATIA V5 Configuration DR1, MD1, ME2, etc. must be installed to run CCD V5. IBM generates two license certificates One for CATIA V5 and the other for CCD, even though CCD is an add-on product Ask for product number 5691CCD. CCD V5R5 comes with a 45 day full-function trial license. 2 IUE and MCX are now included with Base CCD V5, therefore a separate license for these products is not required. The Markup and Annotation product is no longer available in V5.
